Reasons for Allowance

Applicants' response to the last Office Action, filed on May 23, 2005 has been entered and made of record.

The following is an examiner's statement of reasons for allowance:

Independent claims 1, and 41 are allowable over the prior art of record. Claims 2-40 and 53-64 depend from claim 1, therefore, are allowed.

Independent claim 1 recites the limitations of: transform at least one but not all of the transform coordinates into a corresponding image coordinate to generate a set of intermediate coefficients which are functions of at least one coordinate from the image space and at least one coordinate from the transform space in an intermediate pace; adjusting the value of at least one intermediate coefficients and using said adjusted value to generate a set of adjusted intermediate coefficient. The combination of these features as cited in the claims in combination with the other limitations of the claims, are neither disclosed nor suggested by the prior art of record.

Independent claim 41 recites the limitations of : replacing at least one recovered transform coefficient by a value in said adjustment range in a neighborhood comprising: a plurality of less than all of said recovered transform coefficients for which any two recovered coefficients have same values for all the same coordinates except one. The combination of these features as cited in the claims in combination with the other limitations of the claims, are neither disclosed nor suggested by the prior art of record.

Application/Control Number: 09/889,453

Art Unit: 2623

The closest reference of US 5881180 to Change et al discloses a method of adjusting transform coefficients. However, he does not teach the limitations of cited above.

In view of the amended claims and the Applicant's arguments, the rejection to claim 41 is expressly withdrawn.
